## London Excel Boatshow 2006

A successful show for the Rhéa 750 (left) and Rhéa 650 (right), which caught the eyes of many visitors, not to mention the marine industry! Both boats are now with their new owners and we wish them many happy hours aboard.

## UK Debut for the Rhéa 850 at Southampton Boatshow Sept. 06

The third model from the Rhéa range to come to the UK will be the new 850. Available with single or twin engines, this particular boat's specification will include, amongst other things, the classic Rhéa dark blue hull, 315hp Yanmar engine, bow thruster, bathing platform and trolling valve. She will be available for delivery immediately after the show. Please ask for details.

### What's in a Name?

"Rhéa's boats are the 'Rolls' of the French market" -this was the comment of the lorry driver who delivered the boats to the London show! They are bespoke boats, each one hand built to order, with hull colour, engine and specification of your choice. What's the downside? Limited production, so if you don't order one in the autumn you won't get one for the following spring! Rhéa's production sells out every year by the end of the Paris boat-show in December and some models, like the 850 sooner. So, book early!

**Open or Closed?** The 'Open' in some of the model names refers to the aft open cockpit whereas the others are all Wheelhouse models with high bulwarks and walk-around decks..

**Reviews** - the 850 has been well received by the French press and we hope to have her reviewed in the UK soon. However, the 750 review by MBM gives a taster of what Rhéa's are all about. Available on our website: [www.northseamaritime.com](http://www.northseamaritime.com)

**Secondhand Rhéa's:** A number of people have contacted us to source a secondhand Rhéa. Unfortunately they are as limited in supply as the new ones. Best time to look is the end of the year and early part of the next as French owners move up through the range.
