## UK Debut for Rhéa 850

The first 850 to reach UK shores will arrive mid July and will be berthed in the Lymington area until the Southampton boatshow in September. The picture (right) shows her ready for departure outside the Rhéa factory at La Rochelle. Apart from the classic Rhéa dark blue hull, her specification also includes a 315hp Yanmar engine, bow thruster, trolling valve, bathing platform, CX33 E GPS and ICOM VHF. She will be available for sea trials throughout August. Please contact us to make a date!

Steering position (left). Galley (below) with twin burner oven, sink & fridge.

Fwd cabin (not shown) has large double berth & ensuite heads/shower compartment.

850 main saloon - dinette converts to double berth, fwd seat converts to navigators bench.

## DELIVERIES

Like all hand built, luxury goods, the downside is limited production. With the autumn round of boatshows soon to be upon us, Rhéa's production for Spring/Summer 07 will sell out by the end of the Paris boatshow in December and some models, like the 850, sooner. So, talk to us about reserving your build slot.

## 850 TOO BIG?

Why not take a look at the 650 or 750? The same classic lines and attention to detail in a smaller package. Want to get on the water this summer?

**Prefer the Open version?** The Rhéa 850 Open — view at Cannes or La Rochelle boatshows. Ask for info.

Ask us about the 750 for immediate delivery - the Yanmar 240 hp will get the best from this boat, cruising or fishing! Still time left to enjoy the summer!

**Reviews** - the 850 is due to be reviewed by Motor Boats Monthly during the next couple weeks. In the meantime, have a look at the 750 review on our website [www.northseamaritime.com](http://www.northseamaritime.com) or we can let you have some 850 reviews in French. Parlez vous?

**Secondhand Rhéa's:** A number of people have contacted us to source a secondhand Rhéa. Unfortunately they are as limited in supply as the new ones. Best time to look is the end of the year and early part of the next as French owners move up through the range.
