## Rhéa 850

### Has Anyone Seen this Boat?

You may well have done as she has been based in Lymington over the summer, jaunting over to Newtown River, Poole, Studland Bay, Beaulieu River to name but a few. Fitted with a 315hp Yanmar, top speed has been 23.5 knots, cruising speed 18 knots. She even gate-crashed a yacht rally!

### Boat Test

Another of her summer activities was taking part in a boat test for **Motor Boats Monthly**, October edition, on sale at the boat-show. Mark Turley really put her through her paces and we are looking forward to reading all about it. Their review of the Rhéa 750 is already available to read on our website.

**Demonstrations:** The 850 is available for demonstrations from 25th - 30th September only. Thereafter she starts her journey to her new home in Cork. Please call us to arrange as the next 850 into the UK won't be here until December.

### Boat Show Offer:

In addition to avoiding the circa 2% price increase, in force in October, we are offering a half price navigation pack - Simrad 10" Colour radar/GPS/chart plotter with radome, multi-display, VHF radio - for all orders confirmed by end September. Don't forget, to guarantee a Spring 07 delivery you need to book your slot before the Paris boatshow in December, so why not do it now and save some money in the process?

**Open or Closed?** The 'Open' in some of the model names refers to the aft open cockpit whereas the others are all Wheelhouse models with high bulwarks and walk-around decks..

**Colour of Your Choice?** Apart from the classic Rhéa blue/white hull, they are available as red/white, green/white or vice versa. And you can personalise the interior with a choice of woodwork and fabrics.

**Diary Date:** Paris boatshow - 1st to 11th December. Rhéa will be showing all current production models. Ask us for more details.

Prices have been held for UK clients until the end of September. Thereafter the new September 06 prices shown below will be in force. \*Sterling indication prices, based on €1.45 = £1, VAT at 17.5%
